DATE: December 5, 2000
TO: George Alther, Biomin Inc.,
FROM: T. Ramos, Site Manager, Environmental Services
SUBJECT: USAGE OF ORGANO-CLAY IN OUR TREATMENT SYSTEM,
GENERAL MOTORS PONTIAC SITE

The aforementioned product as used in our storm water treatment system has become an integral part of prefilter process. The product came highly recommended by our consultant, and since we have used it, we have reduced the loading of organic material in our carbon beds there by increasing their effectiveness.

Thanks for the product and the continued support. If you have questions, please feel free to contact me at (248) 857-0421.

Cc: Robert Greene, GM Pontiac

This order was changed out after two years and two months – G. Alther
